Hanwen Bi

(571) 353-8300
hb2618@columbia.edu
500 W 120th St, New York, NY 10027

EDUCATION

Columbia University **New York, NY**
M.S. in Biomedical Engineering Aug 2019 - Dec 2020

Northeastern University **Shenyang, CN**
B.E. in Biomedical Engineering Jun 2019
GPA: Overall 3.51/4.00; Major 3.67/4.00

RESEARCH EXPERIENCE

Columbia University **New York, NY**

Intravascular Lumen-wall Separation through DE-CT and Deep Learning Apr 2020 - Present

Lab: Heffner Biomedical Imaging Lab
Advisor: Andrew Laine, Ph.D., Professor of Biomedical Engineering
R. Graham Barr, MD, Ph.D., Professor of Medicine at CUMC
Position: Research Assistant
Responsibilities: -Developing an automatic pipeline to separate lumen and wall on DECT scans through multi-material decomposition
-Utilizing domain adaptation and transfer learning, train a segmentation model on Non-contrast CT scans (or Virtual Non-contrast CT scans)
-Extracted vessel center line and optimized filter result (removed small vessel and disconnected component)

Whole Mouse Brain Neuron Structure and Connections analysis Oct 2019 - Feb 2020

Lab: Heffner Biomedical Imaging Lab
Advisor: Andrew Laine, Ph.D., Professor of Department of Biomedical Engineering
Alex Dranovsky, MD, Ph.D., Assistant Professor of Psychiatry at CUMC
Position: Research Assistant
Responsibilities: -Enhanced the microscopic images of the mouse brain with advanced Vessel Filter, made the axon structure clearer for identification and reduced noises.
-Image registration and analyzing mouse brain connection changes by counting changes in the number of somas in the brain regions.

Neuromatch Academy

Predicting Working Memory Performance Based on Resting State fMRI Data Jul 2020

Advisor: Jeff Yau, Ph.D., Assistant Professor of Neuroscience, Baylor College of Medicine
Responsibilities: -Made project proposal, developed research direction and data process pipeline, programed data preprocess
-Implemented Spectral Co-Clustering method to extract four subnetworks from the whole brain

network

-Utilized a GLM model with L2 regularization to predict participants' performances from subnetworks

Northeastern University **Shenyang, CN**

Construction and Analysis of Functional Brain Network Based on Network Similarity Mar 2018 - Apr 2019

Lab: Medical Imaging and Intelligent Analysis Lab

Advisor: Yueyang Teng, Ph.D., Associate Professor of Biomedical Imaging

Position: Project leader of a three-person group

Responsibilities: -Made project proposal, consulted references to keep up with the cutting-edge development, and coordinated routine work of members

-Preprocessed brain f-MRI imaging and constructed brain network with DPABI

-Wrote code in Python to extract network characteristics to classify image data (AD/MCI/NC) base on Tensorflow

-Successfully applied deep learning method of graph convolutional network to non-Euclidean data and obtained more comprehensive information of network

Construction, Feature Extraction and Analysis of Brain Function Network Mar 2017 - Mar 2018

Lab: Medical Imaging and Intelligent Analysis Lab

Advisor: Xuan He, Ph.D., Lecture, Department of Biomedical Informatics

Position: Core member of a five-person group

Responsibilities: -Read references about brain science and neuroimage

-Collected MRI data from ADNI database and used DPABI to preprocess data

Design and Implementation of Obstetric Referral System Based on B/S Architecture Oct 2016 - Dec 2016

Tutor: Jingshu Zhang, Ph.D., Lecture, Department of Biomedical Informatics

Responsibilities: Designed and implemented back-end database in MySQL and front-end web page based on PHP

PET Reconstruction Based on MLEM Algorithm Apr 2016 - Jun 2016

Tutor: Dayu Xiao, Lecture, Department of Biomedical Imaging

Responsibilities: Programmed the functional interface and debugged the application using C++

Course Project

Functional Brain Network Analysis Using Sparse Representation Methods Spring 2020

Course: ELENE6876 Sparse and Low-Dimensional Models for High-Dimensional Data

Lecture: John Wright, Ph.D., Professor of Electrical Engineering

Responsibilities: -Successfully implemented the sparse subspace clustering method to reveal the relationship between different brain areas

-Utilized the robust principle content analysis method to extract information from the brain network to interpret the latent information

INTERNSHIP EXPERIENCE

Neusoft Group Inc., **Shenyang, CN**

Medical Image Management System Based on Android Jul 2018 - Aug 2018

Responsibility: Programmed app front-end interface and server, and decoded JSON data using Java

Product Function: User/doctor: to register/log in; Doctor: to upload/download images from the server

Modern Traffic Control System Jul 2017 - Aug 2017

Responsibility: Programmed image processing & analyzing module

Product Function: To read vehicle pictures and upload them to the server; to recognize license plate numbers and input them to the server

PROFESSIONAL AFFILIATION

OHBM Student Member 2019 - 2020

CONFERENCES/WORKSHOPS

OHBM 2020 Jun 2020

Neuromatch Academy 2020 (Interactive Track) Jul 2020

SKILLS

Programming: Python, Matlab

Frameworks & Tools: Pytorch, Keras, DPABI, Fiji (ImageJ), NeuroScope

SCHOLARSHIPS AND AWARDS

Northeast University Graduate Scholarship, Northeastern University 2018 - 2019

Scholarship for Outstanding Students, Northeastern University 2017 - 2018

Scholarship for Outstanding Students, Northeastern University 2016 - 2017

Scholarship for Outstanding Students, Northeastern University 2015 - 2016

2017 Outstanding Social Practice Report Award, Northeastern University 2017

2016 Outstanding Social Practice Individual Award, Northeastern University 2016

SOCIAL ACTIVITIES AND STUDENT WORK

Leader, 2017 Summer Social Practice for visiting Ansteel and studying Spirit Mengtai (a model worker characterized for his arduous struggle) 2017

Core Member, Winter Social Practice for enrollment promotion of Northeastern University 2016, 2017

Participant, Spring Sports Meeting of Northeastern University – Men's 1500m 2017

Player, Soccer Match of Northeastern University 2016, 2017

Leader, 2016 Daily Social Practice, investigating the industry situation and development prospect of BME major and visiting Neusoft Group Inc. 2016

Member, Department of Art of Student Union of BMIE College, Northeastern University 2015 - 2016

- Leader and Participant of Team Event & Jump Rope of Sports Meeting and coordinator of all team members for training
- Director of New Year's Day Party

Volunteer Teacher, Guangming Primary School and Luguan Primary School (twice a week) 2015 - 2016
