

# Hanwen Bi

Personal Page: <https://harveybi.github.io/>

Tel: (571) 353-8300 Email: [hb2618@columbia.edu](mailto:hb2618@columbia.edu)

Address: 250 Manhattan Ave, New York, NY 10026

## EDUCATION

---

### Columbia University

M.S. in Biomedical Engineering

New York, NY

Aug 2019 - Dec 2020

### Northeastern University

B.E. in Biomedical Engineering

GPA: Overall 3.51/4.00; Major 3.67/4.00

Shenyang, CN

Jun 2019

## RESEARCH EXPERIENCE

---

### Columbia University

New York, NY

#### Unravel developing infant brain network patterns with deep learning

Sep 2020 - Present

Advisor: Andrew Laine, PhD, Professor of Biomedical Engineering  
Jonathan Posner, MD, Professor of Psychiatry at CUMC

Position: Research Assistant

Responsibilities: -Investigating the existence of default mode network in infant brain in different monthly period  
-Tracking and modelling infant brain pattern changes across the first few years of life  
-Implementing variational autoencoder to model the temporal dynamics of rs-fMRI in latent space

#### Intravascular Lumen-wall Separation through DE-CT and Deep Learning

Apr 2020 - Present

Advisor: Andrew Laine, PhD, Professor of Biomedical Engineering  
R. Graham Barr, MD, PhD, Professor of Medicine at CUMC

Position: Research Assistant

Responsibilities: -Developing an automatic pipeline to separate lumen and wall on DECT scans through multi-material decomposition  
-Utilizing domain adaptation and transfer learning, training a segmentation model on Non-contrast CT scans (or Virtual Non-contrast CT scans)  
-Extracted vessel center line and optimized filter result (removed small vessel and disconnected component)

#### Whole Mouse Brain Neuron Structure and Connections analysis

Oct 2019 - Feb 2020

Advisor: Andrew Laine, PhD, Professor of Department of Biomedical Engineering  
Alex Dranovsky, MD, PhD, Assistant Professor of Psychiatry at CUMC

Position: Research Assistant

Responsibilities: -Enhanced the microscopic images of the mouse brain with advanced Vessel Filter,

made the axon structure clearer for identification and reduced noises.  
 -Image registration and analyzed mouse brain connection changes by counting changes in the number of somas in the brain regions.

## Neuromatch Academy

### Predicting Working Memory Performance Based on Resting State fMRI Data

Jul 2020

Advisor: Jeff Yau, PhD, Assistant Professor of Neuroscience, Baylor College of Medicine  
 Responsibilities: -Made project proposal, developed research direction and data process pipeline, programmed data preprocess  
 -Implemented Spectral Co-Clustering method to extract four subnetworks from the whole brain network  
 -Utilized a GLM model with L2 regularization to predict participants' performances from subnetworks

## Northeastern University

Shenyang, CN

### Construction & Analysis of Functional Brain Network Based on Network Similarity

Mar 2018 - Apr 2019

Advisor: Yueyang Teng, PhD, Associate Professor of Biomedical Engineering  
 Position: Project leader of a three-person group  
 Responsibilities: -Made project proposal, consulted references to keep up with the cutting-edge development, and coordinated routine work of members  
 -Preprocessed brain f-MRI imaging and constructed brain network with DPABI  
 -Successfully applied deep learning method of graph convolutional network to non-Euclidean data and obtained more comprehensive information of network for classification (AD/MCI/NC)

## Course Project

---

### Functional Brain Network Analysis Using Sparse Representation Methods

Spring 2020

Course: ELENE6876 Sparse and Low-Dimensional Models for High-Dimensional Data  
 Lecture: John Wright, PhD, Associate professor of Electrical Engineering  
 Responsibilities: -Successfully implemented the sparse subspace clustering method to reveal the relationship between different brain areas  
 -Utilized the robust principle content analysis method to extract information from the brain network to interpret the latent information

## INTERNSHIP EXPERIENCE

---

### Neusoft Group Inc.,

Shenyang, CN

#### Medical Image Management System Based on Android

Jul 2017 - Aug 2017

Responsibility: Programmed app front-end interface and server, and decoded JSON data using Java  
 Product Function: User/doctor: to register/log in; Doctor: to upload/download images from the server

#### Modern Traffic Control System

Jul 2016 - Aug 2016

Responsibility: Programmed image processing & analyzing module  
 Product Function: To read vehicle pictures and upload them to the server; to recognize license plate numbers and input them to the server

## **PROFESSIONAL AFFILIATION**

OHBM Student Member	2019 - 2020
---------------------	-------------

## **CONFERENCES/WORKSHOPS**

OHBM 2020	Jun 2020
Neuromatch Academy 2020 (Interactive Track)	Jul 2020

## **SKILLS**

Programming: Python, Matlab  
Frameworks & Tools: Pytorch, Keras, DPABI, Fiji (ImageJ), NeuroScope

## **SCHOLARSHIPS AND AWARDS**

Northeast University Graduate Scholarship, Northeastern University	2018 - 2019
Scholarship for Outstanding Students, Northeastern University	2017 - 2018
Scholarship for Outstanding Students, Northeastern University	2016 - 2017
Scholarship for Outstanding Students, Northeastern University	2015 - 2016
2017 Outstanding Social Practice Report Award, Northeastern University	2017
2016 Outstanding Social Practice Individual Award, Northeastern University	2016

## **SOCIAL ACTIVITIES AND STUDENT WORK**

<i>Leader</i> , 2017 Summer Social Practice for visiting Ansteel and studying Spirit Mengtai (a model worker characterized for his arduous struggle)	2017
<i>Core Member</i> , Winter Social Practice for enrollment promotion of Northeastern University	2016, 2017
<i>Participant</i> , Spring Sports Meeting of Northeastern University – Men's 1500m	2017
<i>Player</i> , Soccer Match of Northeastern University	2016, 2017
<i>Leader</i> , 2016 Daily Social Practice, investigating the industry situation and development prospect of BME major and visiting Neusoft Group Inc.	2016
<i>Member</i> , Department of Art of Student Union of BMIE College, Northeastern University	2015 - 2016
<ul style="list-style-type: none"><li>• Leader and Participant of Team Event &amp; Jump Rope of Sports Meeting and coordinator of all team members for training</li><li>• Director of New Year's Day Party</li></ul>	
<i>Volunteer Teacher</i> , Guangming Primary School and Luguan Primary School (twice a week)	2015 - 2016
